A Legacy for Living Rivers
The Luna B. Leopold Legacy Society

“Water is the most critical resource issue of our lifetime and our children’s lifetime. The health of our waters is the principal measure of how we live on the land.”

– Luna B. Leopold

Luna B. Leopold was a scientist, writer and educator. His studies of rivers and their flows and movements provided enduring insights into how rivers shape themselves, and shape the land.

The Luna B. Leopold Legacy Society was established to strengthen International Rivers’ long-term financial health and to support our efforts to protect rivers around the world and defend the rights of the people who depend on them.
