

# KEEP **DIRTY ENERGY** OUT OF THE GREEN CLIMATE FUND

We should be investing in clean energy if we want to combat global climate change.

## CLEAN

Rural Electrification Project, Peru

- Megawatts to be produced: 60-70kw each for 12,500 home systems
- CO2 to be avoided: 30,000 tons
- Energy access to be created for 500,000 households
- Jobs to be created: 1,000
- Profits to accrue to community, solar industry
- Time to completion: 5 years

**TOTAL COST: \$200 MILLION**

## DIRTY

Tata Mundra Power Plant, India

- Megawatts produced: 4000
- CO2 emitted: 40 million tons annually
- Energy access created: none, adds to central grid
- Jobs created: 800 temporary, less than 10 local
- Profits accrue to private sector
- Time to completion: 6.5 years

**TOTAL COST: \$1.14 BILLION**

Tell the U.S. Government to keep the Green Climate Fund clean at:

[bit.ly/CleanGCF](http://bit.ly/CleanGCF)

It's the best chance we have to solve climate change.
