

KEEP **DIRTY ENERGY** OUT OF THE GREEN CLIMATE FUND

We should be investing in clean energy if we want to combat global climate change.

CLEAN

RERED Program, Sri Lanka

- Megawatts produced: 166
- CO2 avoided: 1,250,000 from 1997-2011
- Creates energy access for 160,000 households
- Jobs created: new employment valued at \$3 million
- Profits accrue to community
- Time to completion: 8 years

TOTAL COST: \$266.4 MILLION

DIRTY

Inga 3 Dam, DRC

- Megawatts to be produced: 4800
- CO2 to be avoided: unknown
- 80% of energy created to be for export and mining sectors
- Jobs to be created: unknown
- Profits would accrue to private sector
- Time to completion: 8 years for construction alone

TOTAL COST: \$14 BILLION

Tell the U.S. Government to keep the Green Climate Fund clean at:

bit.ly/CleanGCF

It's the best chance we have to solve climate change.
